FELLOWSHIP PLEDGE

RECOGNIZING that the American College of Surgeons seeks to develop, exemplify, and enforce the highest traditions of our calling, I hereby pledge myself, as a condition of Fellowship in the College, to live in strict accordance with all its principles, declarations, and regulations. ❧ ❧ In particular, I pledge myself to pursue the practice of surgery with thorough self-restraint and to place the welfare of my patients above all else; to advance constantly in knowledge by the study of surgical literature, the instruction of eminent teachers, interchange of opinion among associates, and attendance on the important societies and clinics; to regard scrupulously the interests of my professional brothers and seek their counsel when in doubt of my own judgment; to render willing help to my colleagues and to give freely my services to the needy. ❧ ❧ Moreover, I pledge myself, so far as I am able, to avoid the sins of selfishness; to shun unwarranted publicity, dishonest money-seeking, and commercialism as disgraceful to our profession; to refuse utterly all secret money trades with consultants and practitioners; to teach the patient his financial duty to the physician and to urge the practitioner to obtain his reward from the patient openly; to make my fees commensurate with the service rendered and with the patient's rights; and to avoid discrediting my associates by taking unwarranted compensation. ❧ ❧ Finally, I pledge myself to co-operate in advancing and extending, by every lawful means within my power, the influence of the American College of Surgeons.

GENERAL STATEMENT

ORGANIZATION OF THE COLLEGE

THE American College of Surgeons is a society of surgeons of the United States and of Canada which aims to include within its Fellowship all who are of worthy character and who possess a practical knowledge of the science and art of surgery. The College is fundamentally concerned with matters of character and of training, with the betterment of hospitals and of teaching facilities in medical schools and hospitals, with laws which relate to medical practice and privilege, and with an unselfish protection of the public from incompetent medical service.

The College was organized on May 5, 1913, in Washington, D. C., when four hundred and fifty prominent surgeons came together at the invitation of an Organization Committee which had been appointed by the Clinical Congress of Surgeons of North America at its meeting in November, 1912. This Committee consisted of Edward Martin of Philadelphia, Emmet Rixford of San Francisco, John B. Murphy of Chicago, Rudolph Matas of New Orleans, Albert J. Ochsner of Chicago, Charles H. Mayo of Rochester, Frederic J. Cotton of Boston, George Emerson Brewer of New York, John M. T. Finney of Baltimore, Walter W. Chipman of Montreal, George W. Crile of Cleveland, and Franklin H. Martin of Chicago. By-laws, rules, and regulations were adopted, and the Board of Regents, the Board of Governors, and officers of the College were elected. Details of these matters are published in the Year Book and in bulletins of the College.

THE ENDOWMENT FUND

In order to provide funds for the organization of the College, an initial fee of fifty dollars from each Fellow was voted at the first meeting. Realizing that the income to be derived in this

manner was temporary and inadequate, and desiring to place the College on a sound financial basis, the Fellows voted in June, 1914, to raise an Endowment Fund of one million dollars. This plan provided that the Endowment should be invested in perpetuity and only the income used for the budget of the College.

It developed later that the educational work of the College called for expenditures beyond the income provided by the interest of the Endowment, and the Fellows of the College, at the annual meeting held in Philadelphia in 1916, voted that those who had not subscribed to the fund should be assessed by annual dues of twenty-five dollars each. The full resolution provided:

1. That the initial Fellowship fee of the College is \$100, payable upon notification of election to Fellowship. The initial Fellowship fee of candidates whose applications were filed at the executive offices of the College before November 1, 1914, is \$50.

2. That annual dues of the College are provided as follows:

1. That the annual dues of the Fellows of the College be \$25, payable January 1.

2. That all Fellows who have subscribed \$500 to the Endowment Fund of the College be exempt from annual dues.

3. That the total amount required of any Fellow in annual dues or other fees shall not exceed \$500.

4. That the Board of Regents cancel the indebtedness of any Fellow of the College, without publicity, to whom, in its judgment, such dues are a hardship.

5. That no Fellow of the College be asked to contribute any fee whatever to the College either after sixty-five years of age or after he has retired from the active practice of surgery.

More than half a million dollars has already been raised for the Endowment, and the Regents desire to bring the fund up to one million dollars as rapidly as possible. A Fellow may become a life member of the College at any time by subscribing five hundred dollars to the permanent Endowment Fund. Subscription cards, similar to the illustrated form, may be obtained from the Secretary General of the College.

In case of death all unpaid balances are cancelled.

ENDOWMENT FUND

I hereby subscribe Five Hundred Dollars (\$500) to the Endowment Fund of the American College of Surgeons, the amount to be paid in installments as follows:

THE CLINICAL CONGRESS OF THE AMERICAN COLLEGE OF SURGEONS

By the joint action of a committee appointed by the Clinical Congress of Surgeons of North America and of the Regents of the College, the Clinical Congress of Surgeons became, on October 25, 1917, the Clinical Congress of the American College of Surgeons. The following resolution effected the merger of these two organizations:

WHEREAS, the past presidents of the Clinical Congress of Surgeons were, on October 26, 1916, in Philadelphia, appointed as a Committee with power to act, to confer with the American College of Surgeons with a view to closer affiliation between these two organizations; and

WHEREAS, the Regents of the College, in accordance with Section VI, Article 3 of the By-Laws of the College, constitute a governing board with power to act with regard to the proposed affiliation. Now, therefore,

BE IT RESOLVED, that it is the unanimous decision of the Committee of the Clinical Congress of Surgeons of North America, as above stated, and of the Regents of the American College of Sur-

geons in joint session, first, that for the welfare of the two organizations the management and the control of the Clinical Congress of Surgeons shall be vested hereafter in the American College of Surgeons; second, that hereafter the Clinical Congress of Surgeons shall be known as the Clinical Congress of the American College of Surgeons with its invited guests.

The past presidents of the Clinical Congress of Surgeons are Dr. Albert J. Ochsner of Chicago, Dr. Edward Martin of Philadelphia, Dr. George E. Brewer of New York, Dr. John B. Murphy of Chicago, Dr. Charles H. Mayo of Rochester, Dr. Fred B. Lund of Boston, Dr. John G. Clark of Philadelphia, and Dr. William J. Mayo of Rochester.

REQUIREMENTS FOR FELLOWSHIP

Immediately after the organization of the College the Board of Regents authorized the appointing of Committees on Credentials. These Committees consist of the Central Committee which reports its recommendations for Fellowship directly to the Regents, and of State and Provincial Committees which report to the Central Committee.

In a separate bulletin the requirements for admission are published in detail. Briefly stated, these requirements are as follows:

1. The candidate shall be a graduate in medicine, licensed to practice medicine in his respective state or province, or accepted as a medical officer in the service of his country.
2. To be eligible for Fellowship without technical examination the candidate shall be a graduate of a medical school approved by the American College of Surgeons. If the candidate's school of graduation is not accredited by the American College of Surgeons, he may be required to pass a technical examination in one subject or all subjects of the medical curriculum.
3. The candidate shall give evidence that he has served at least one year as interne in a creditable hospital and two years as surgical assistant, or he shall give evidence of apprenticeship of

equivalent value. Five to eight years after graduation in medicine, devoted to special training and to practice, are normally the time-requirement for eligibility to Fellowship. Due importance is attached to laboratory and research work.

4. The moral and ethical fitness of the candidate shall be determined by reports of surgeons whose names are submitted by the candidate himself, and by such other reports and data as the Credentials Committee and the administration of the College may obtain.

5. The professional activity of the candidate shall be restricted to the study, diagnosis, and operative work in general surgery or in special fields of surgery, such as eye, ear, nose, and throat, genito-urinary, orthopedics, and gynecology and obstetrics, as follows: First, if the candidate resides in a city of less than fifty thousand inhabitants, at least fifty per cent. of his professional activity shall be restricted to practice of general surgery or to practice within special fields of surgery as stated. Second, in cities of over fifty thousand inhabitants, at least eighty per cent. of the professional activity of the candidate shall be restricted to practice of general surgery or to practice within special fields of surgery. In other words, the College desires to admit to its Fellowship only those who are primarily specialists in surgery, and the minimum proportion of specialization which is acceptable may vary according to the size of the city in which the candidate resides.

6. The candidate shall make formal application for Fellowship. Blank forms for this purpose may be had from the Secretary General of the College upon request.

7. In making application for Fellowship the candidate shall sign a declaration which reads as follows:

“Upon my honor as a gentleman, I hereby declare that I will not practice the division of fees, either directly or indirectly, in any manner whatsoever.”

In the meaning of this declaration the signer agrees that in order to obviate any semblance of the division of fees, he will as a

general principle of practice not collect fees for others referring patients to him; nor permit other doctors to collect fees for him; nor make joint fees with physicians or surgeons referring patients to him for operation or consultation.

8. As evidence of his qualifications in the technique of surgery, the candidate is requested to submit in complete detail the case records of fifty consecutive major operations which he has performed himself.

9. In addition to the complete case records of fifty consecutive major operations, the candidate is asked to submit in brief abstract a report of at least fifty other major operations in which he has acted as assistant or which he has performed himself.

10. Surgeons widely recognized by the profession as progressive leaders and exponents of finished technique may, by a unanimous vote of the Board of Regents, be admitted to Fellowship on recommendation of the Committee on Examinations.

11. The Regents of the College reserve the right to alter, as they may think proper, the regulations respecting admission of Fellows to the College.

FELLOWSHIP IN THE AMERICAN COLLEGE OF SURGEONS EXTENDED TO SOUTH AMERICAN SURGEONS

Since the inception of the American College of Surgeons, its organizers have had in mind that the College should become comprehensively American, eventually including in its Fellowship all worthy surgeons of the American continents.

During 1914 and 1915 a preliminary correspondence with the surgeons of South America was entered into by the Office of the College under the guidance of a special Spanish-speaking secretary, who conducted the correspondence in Spanish. This was undertaken as a precursor of a visit that was to be made in the winter of 1915-1916. The European War, which was threatening the usefulness and safety of the shipping routes of the Western Hemisphere, coupled with our own interest in the conflict, compelled us

to postpone further thought of an immediate visit to the southern continent.

Upon the signing of the armistice, it became apparent that, with the educational institutions of Europe disorganized and European travel discouraged, the time was particularly opportune for the revival of our plans to visit the surgeons of the various countries of our own South America.

The suggestion came almost simultaneously from our President, Dr. W. J. Mayo, and several members of the Board of Regents of the College, and with an assurance on the part of the President that he personally would make the trip, our correspondence was hurriedly revived, travel arrangements promptly made, and January 7 set as the time for our departure.

On December 20, the Secretary General laid the tentative plans before the Board of Regents, and they were received with hearty approval. As a preliminary, committees of surgeons in Peru, Chile, Argentina, and Uruguay were selected, and we communicated to the individual members of each committee the object of our contemplated visit, informing them at the same time of the approximate time of our arrival. The following extract from this correspondence will reveal more definitely our plans:

. . . The principal object of our tour is to enlist the interest of the surgical profession of your countries in the American College of Surgeons, with the idea of ultimately extending to the surgeons of South America an invitation to become Fellows of the College.

. . . Could you arrange to have a small group of from five to ten of your surgeons meet with us at the time of our visit to discuss our problem? Fellowship in the American College of Surgeons is open to all general surgeons and surgical specialists. . . . Therefore, in selecting the group for the preliminary conference, you may take into consideration these specialties. . . .

At our conference we would suggest that the following matters be considered:

"1. As a means of promoting a closer affiliation between the professions of the South and North American continents, will the surgeons of your country desire to become Fellows of the American College of Surgeons on an equal basis with the surgeons of North America?

"2. Should you favor such affiliation, will you have prepared in advance and furnish to us at our conference a carefully selected

list of the eminent surgeons of your country who, because of their standing in the profession, should be recommended for Fellowship in the College without examination?

"3. Will you be prepared to suggest to us at the conference a plan that will aid in bringing about a closer relationship between the surgeons of your country and the surgeons of the United States and Canada?"

In the four countries visited, namely, Peru, Chile, Argentina, and Uruguay, our reception was most flattering and cordial. The group of surgeons with whom we had corresponded were ready and anxious to co-operate with us in our desire to bring about an affiliation through the College between the professions of the two continents of the Western Hemisphere.

A concrete result of our visit is revealed by the fact that thirty-five South American surgeons were received into Fellowship at the 1920 Convocation of the College at Montreal. Fourteen of these surgeons are from Peru, eleven from Chile, two from Argentina, and eight from Uruguay.

Committees on Credentials have been established in each of the countries visited, and a considerable number of candidates for Fellowship are under consideration for future membership.

This visit to South America was preliminary to similar conferences that will be held with other republics of that interesting continent—conferences that will, we trust, result in mutual benefit through the interchange of professional opinions and courtesies between the surgeons of the two American continents.

THE GREAT MACE

THE GREAT MACE PRESENTED TO THE AMERICAN
COLLEGE OF SURGEONS BY THE CONSULTING
SURGEONS OF THE BRITISH ARMIES

This Mace has been designed so as to tell in a symbolic way of the close union between British and American surgery, and of the ties which unite Great Britain to Canada and to the United States of America. It retains the traditional shape and proportions of the Civic Mace of the seventeenth century, and is of hand-wrought chiselled and repoussé silver gilt. It was made by Omar Ramsden, who embodied in his design some suggestions of the donors.

THE DEDICATORY INSCRIPTION engraved on the plate under the Crown sets forth that the Mace is a gift "From the Consulting Surgeons of the British Armies to the American College of Surgeons, in memory of mutual work and good-fellowship in the Great War, 1914-1918."

THE CROWN SHAPED FINIAL is formed of six rich scroll buttresses upholding the "Sacred Flame of Science" issuing from a mortar of antique pattern, the model of which was recently found on the field of battle near Salonika. These buttresses spring from a cresting composed of alternating Maple leaves and American Eagles intertwined with the Serpents of Esculapius, while the position usually occupied by a band of jewels in a monarchical crown is filled with the words "The American College of Surgeons."

THE BODY OR HEAD is divided into six panels by the Winged Caduceus, being an ornamental rendering of the badge of the United States Army Medical Corps. The panels set forth the following "Achievements at Arms" in delicate and finely detailed repoussé work:

1. The full Blazon of the United States of America.
2. The Dominion of Canada.
3. The Royal College of Surgeons of England.
4. The Badge of the Royal Army Medical Corps.
5. The Shields of Arms of John Hunter and Lord Lister.
6. A Cartouche bearing the words "Philip Syng Physick 1768-1837, Father of American Surgery."

The lower portion of the Head is decorated with a symbolic band of water indicating the ocean which both unites and separates America and the Mother Country. The latter is symbolized by the British Lion Brackets of highly chiselled work which support the head and terminate the upper part of the staff. The talons of the lion's feet grip the hammered decoration of the upper knop, which consists of a design of American and Canadian Maple seed-pods and heart-shaped spaces. This hammered work is protected by boldly projecting, solid, jewel-like bosses of chiselled work.

THE STAFF is decorated with a free design of the national floral emblems of the United Kingdom — the Rose, the Thistle, the Shamrock, and the Leek. Intertwined among these are a number of ribbon scrolls, each one of which bears the name of one of the donors.

THE FOOT bears, as decoration, the root form from which the above spring and a series of six small shields which may be used for possible future arms of inscriptions. The extreme bottom knop is fluted with leaves of *Isatis tinctoria*.

The various parts are held together, in the traditional manner, by a rod of English Oak cut from a tree grown at Wytham, Berks. The extreme length is 3 feet 11 $\frac{1}{8}$ inches, and the weight of silver is 140 ounces troy.

PRESENTATION AND ACCEPTANCE OF THE GREAT MACE

The ceremony of presenting the Great Mace to the American College of Surgeons was an occasion of deep interest to the Fellows who were in attendance at the initial meeting of the tenth annual session of the Clinical Congress, held in Montreal.

The Presentation Committee consisted of Sir Berkeley Moynihan, K.C.M.G., C.B., of Leeds, Sir William Taylor, K.B.E., of Dublin, and Dr. Albert Carless, C.B.E., of London. In making the presentation, Sir Berkeley Moynihan, Chairman of the Committee, said:

"Three centuries ago, on this very day, a little sailing vessel, leaving England far behind her, was struggling against adverse winds and heavy seas towards America. On board were one hundred pilgrims fleeing from civil and religious tyranny to seek sanctuary and freedom in a new land. No voyage in history has been so fateful. Those who journeyed in that vessel, a chosen company on the horizon of your history, were the best of English stock. They helped to found here a small colony of people, grim and stoical in spirit, yet touched with idealism. Though all the great countries of the earth have since given of their best to build this Nation, those few pilgrims have left their indelible stamp upon the culture, the institutions, and the laws of this land.

"Almost a century and a half ago that Colony broke away from the Mother Country with which it was long at war. But one hundred years of peace between the two nations had been celebrated when in 1917 they stood together in arms. War is the great Revealer. We learned in that great testing time of our race that ties of blood, when they mean kinship in spirit and an equal surrender to the noblest impulse, are never to be broken. In the

Great War America and the Empire mingled their blood upon the same stricken field. The hope then grew strong in many hearts that a new understanding born of comradeship in battle, fiercely tested in the furnace of affliction, and sealed in death, would redeem the ancient blunders, blot out the bitter memories of wrong, and lead at last to a supreme and permanent reconciliation. For we seemed then to realize that deep down in the hearts, enthroned in the conscience of the two peoples there was the same full eager devotion to eternal principle, love of justice, joy in liberty, hatred of oppression; the same unselfish determination to strive for the redemption of mankind and to establish anew the freedom of the world. On the fields of Flanders and of France, as in the cabin of the Mayflower, humanity recovered its rights.

"In the grave and anxious days of war when we fought so long in fellowship, no associations were closer, no friendship more swift and intimate, no joint labors more fruitful than those of the members of our profession coming from America and from every part of the British Empire. We then gained each for the other, not respect and sympathy alone; but true affection also. Every lover of his country, every lover of humanity, must wish that the spiritual alliance then created shall endure to the end of time. In our desire to perpetuate the remembrance of those days of duty done together, we, the Consultant Surgeons of the Armies of Britain, ask the American College of Surgeons, meeting in this great Dominion, to accept this Mace. We pray that you may regard it as a symbol of our union in the harsh days of trial; as a pledge of our devotion to the same imperishable ideals; as a witness to our unflinching and unchanging hope that the members of our profession in the two lands shall be joined in brotherhood forever in the service of mankind."

The President of the College, Dr. George E. Armstrong of Montreal, responding, said:

"Sir Berkeley Moynihan, as President of the American College of Surgeons I accept this beautiful Mace, presented by you on behalf of the Consulting Surgeons of the British Armies, with thanks and a full appreciation of the care and thought bestowed upon its design and construction. We accept it as a

token of the cordial relationship that obtains between the surgeons of the two great nations here represented. It is a symbol of the zeal and enthusiasm in our art which, originating in the Old World, has spread to the New World. We shall endeavor in this western hemisphere to keep the 'sacred flame of science' burning not less brightly than have our forbears in Great Britain. It will remain with us an emblem of unity, a work of art, and a remembrance of the united effort of the two great English-speaking nations to give truth, liberty, and justice to all peoples and to all nations. The scientific fire represented in this gift welds another link in the chain that shall forever bind us together in the great work of promoting the highest possible standard of surgery, as well as peace and good will among men."

THE NEW HOME OF THE COLLEGE

On May 1, 1920, the administrative offices of the American College of Surgeons were transferred to the permanent location at 40 East Erie Street, Chicago.

The new home of the College, which is a commodious and handsome structure with adjoining land suitable for future extension, was purchased and presented to the College by public-spirited lay citizens of Chicago and a group of Fellows of the College residing in that city. The home, besides furnishing an adequate business office for the College, will provide a dignified and suitable meeting place for local and visiting surgeons. This property, coming to the College as an absolute gift, becomes a valuable asset, and its central location in the heart of Chicago makes it an ideal permanent home for the institution.

The adjoining pages contain a reproduction of the bronze tablet which adorns the building and which records the names of those who contributed to its purchase, and also two cuts which very imperfectly illustrate the building with its surroundings. This property is within a few blocks of the center of the business loop of Chicago, and in a location that is not only ideal for the home of our institution but one in which the land value will rapidly increase.

The Fellows of the American College of Surgeons are invited to inspect the new home and to make it their headquarters when visiting Chicago.

THE COLLEGE LIBRARY

A gift of inestimable value has been bestowed upon the Fellows of the American College of Surgeons. The Library of Dr. John B. Murphy is one which only a master mind could have collected. It will serve as a continual source of inspiration to many who have not had the privilege of learning directly from the great teacher and surgeon.

There is not a field in surgery which has not been profoundly influenced by Doctor Murphy's discoveries. His achievements in

various fields — particularly in the surgery of the bones and joints, the abdomen, the vascular system, and the nervous system — were the product of a genius and skill seldom equaled. In the Library which has passed on to us will be found many of the choicest scientific works, with personal annotations indicating constant use. The fundamental branches of anatomy, physiology, and pathology are represented by some of the finest works produced in both America and Europe. The section on cancer is particularly complete. The surgical portion of the Library is very comprehensive, including especially interesting collections on orthopedic, abdominal, and genito-urinary surgery, in addition to the best of the general surgical monographs. Through the generosity of Mrs. Murphy, the leading surgical works published during the past four years have been added to the collection. The Library will be exceedingly useful for reference and research purposes in that it contains bound files of the leading medical and surgical journals—American, English, and German — for the past thirty years, and some for even longer periods. The proceedings of the leading surgical societies are also represented. That Doctor Murphy was a true scholar with very broad literary and scientific interests is exemplified by the fact that various works on general science, on biography, and excellent dictionaries and encyclopedias are included in this valuable collection.

His clearness of vision and complete knowledge of the work of those who preceded him have given to his scientific contributions rare qualities of permanence and originality. It is hoped that this Library may form the nucleus for one of the best surgical libraries in the country, and that the Library, together with the Literary Research Department to be organized in conjunction with it, may help to spread the ideals of this great teacher and surgeon. It will be the aim of the Department to further the standardization of literature on surgery and closely allied subjects, to help in the preparation of contributions to surgical literature, and to encourage the wider reading and study of scientific subjects through the more general establishment of hospital libraries and smaller literary research departments, thus perpetuating the scientific spirit which animated the life of the great surgeon. .

CONVOCATIONS

The first Convocation of the College was held in Chicago on November 12, 1913. The Fellowship address was delivered by Sir Rickman Godlee, Bart., K.C.V.O., LL.D., F.R.C.S., President of the Royal College of Surgeons of England. Fellowships were conferred upon 1,059 candidates. At this time Sir Rickman presented to the College the following greetings from the Royal College of Surgeons:

"We, the Council of the Royal College of Surgeons of England, have heard with much interest of the approaching inauguration of the American College of Surgeons. We hereby convey to it our hearty good wishes, and express the hope that it may have a successful career and fill a position beneficial alike to the Profession and to the Community.

"We cannot forget the important advances in the Science and Art of Surgery achieved by many distinguished Surgeons in the Continent of America during the past, and are proud to have enrolled upon our list of Honorary Fellows the names of some of the most active workers in these fields at the present day.

"In accepting the invitation for our President to take part in the opening Ceremony, we desire to show how we appreciate the intention of the American College to strengthen the bonds that already unite the Medical Profession amongst English-speaking peoples. It is a sentiment which always meets with a cordial response in this country, and it is one which this College will endeavor to support by all the means in its power.

"In witness whereof we have caused the Common Seal of the College to be hereunto affixed this 9th day of October, 1913.

President RICKMAN J. GODLEE

Vice-Presidents } G. H. MAKINS
 } FREDERIC EVE."

The second Convocation was held in Philadelphia on June 22, 1914. Fellowships were conferred upon 1,065 candidates. The Fellowship address was delivered by Dr. James G. Mumford of Clifton Springs, New York.

The third Convocation was held in Washington, D. C., on the evening of November 16, 1914. Fellowships were conferred upon 646 candidates. The Fellowship address was delivered by Dr. Edward H. Bradford, Dean of Harvard Medical School.

The fourth Convocation was held in Boston on October 29, 1915. Fellowships were conferred upon 484 candidates. The Fellowship address was delivered by President E. J. James of the University of Illinois.

The fifth Convocation was held in Philadelphia on October 27, 1916. The Fellowship address was delivered by President John H. Findley of the University of the State of New York, and Fellowships were conferred upon 228 candidates.

The sixth Convocation was held in Chicago on October 26, 1917. Fellowships were conferred upon 313 candidates, 37 of these being in the regular service of the United States Army and 25 in the regular service of the United States Navy. The occasion was a great military gathering, hundreds of medical officers being present on leave. The Fellowship address, entitled "What is the War About," was delivered by Sir Berkeley Moynihan, K.C.M.G., F.R.C.S., Colonel in the Royal Army Medical Corps.

The seventh Convocation of the College was scheduled to be held in New York on the evening of October 25, 1918. On October 12, because of the prevalence of influenza throughout Canada and the United States, the Regents considered it imperative to cancel the meeting.

In the meantime the surgeons from England, France, and Italy who had accepted the invitation of the College to take part in the Clinical Congress program had sailed for New York. These surgeons were Sir Thomas Myles, C.B., F.R.C.S., Dublin, Ireland, Honorary Surgeon to His Majesty King George, Consulting Surgeon, Irish Command, Member Board of Consultants, British War Office, and Senior Surgeon, Richmond Hospital, Dublin; Lieutenant Colonel Raffaele Bastianelli, F.R.C.S., Italian Army Medical Corps, Rome, Italy, Associate Professor of Clinical Surgery, Royal University, and Surgeon-in-Chief, First Pavillion, Hospital Policlinico Umberto I; Major Pierre Duval, French Army Medical Corps, Paris, France, Consulting Surgeon to Seventh

Army, Honorary Professor, Faculty of Medicine, Paris, and Surgeon to hospitals of Paris; Colonel George Ernest Gask, C.M.G., D.S.O., F.R.C.S., London, England, Consulting Surgeon, British Expeditionary Forces, Joint Lecturer on Surgery, St. Bartholomew's Hospital, University of London, and Surgeon in Charge of Out-Patients, St. Bartholomew's Hospital; Major George Grey Turner, F.R.C.S., Royal Army Medical Corps, Newcastle-on-Tyne, England, Lecturer on Surgery, University of Durham, and Honorary Assistant Surgeon, Royal Infirmary, Newcastle-on-Tyne; and Major Adrien L. P. Piollet and Major Henri Béclerc, both of the French Army Medical Corps. Lieutenant Colonel George E. Brewer of New York, at the time in service in France, came with these guests as the official representative of the Medical Corps with the American Expeditionary Forces.

In order that the value of the messages which these surgeons brought from the allied lines at the front might not be lost as a result of the cancelled meeting, the College arranged visits to as many of the surgical centers in this country as possible. These visits included Washington, where the foreign guests were greeted by President Woodrow Wilson; Camp Greenleaf, Georgia, where approximately 1,500 doctors were in training; Minneapolis, Rochester, Chicago, Pittsburgh, Philadelphia, and New York.

The seventh Convocation was held in New York on ⁷October 24, 1919, when 325 candidates from the preceding year were formally admitted to Fellowship together with 213 new candidates. The Fellowship address was delivered by Sir Anthony Bowlby, K.C.B., K.C.M.G., K.C.V.O., F.R.C.S., of London, Senior Vice-President of the Royal College of Surgeons of England.

The eighth Convocation was held in Montreal on October 15, 1920, this being the first Convocation to be held in the Dominion of Canada. Fellowships were conferred upon 691 candidates, 497 of these being from the United States, 156 from Canada, 35 from South America, and 3 from China. The Fellowship address was delivered by Sir William Taylor, of Dublin, Ireland. Honorary Fellowships were conferred upon Sir William Taylor, K.B.E., F.R.C.S., of Dublin; Albert Carless, C.B.E., M.B., M.S., F.R.C.S., of London; John C. Fotheringham, B.A., M.D., LL.D.,

of Toronto; Guy Carleton Jones, C.M.G., M.D., M.R.C.S., of Ottawa; William Gardner, M.D., C.M., M.A., of Montreal; and John Stewart, C.B.E., M.B., C.M., LL.D., of Halifax.

At the Presidential Meeting of the Clinical Congress, held on the evening of October 11, the first John B. Murphy Oration on Surgery* was delivered by Sir Berkeley Moynihan, K.C.M.G., C.B., of Leeds, England. At the same meeting the Great Mace, described on page nine, was presented to the American College of Surgeons by the Consulting Surgeons of the British Armies in the World War.

ACADEMIC ROBE

The gown adopted by the Board of Regents to be worn by the Fellows at the Convocations of the College consists of a body of navy blue mohair faced with scarlet velvet. The mortar-board cap is of the same blue material, with a scarlet tassel.

ORGANIZATION OF STATE AND PROVINCIAL CLINICAL SECTIONS

In order to promote within the individual states and provinces the purposes for which the American College of Surgeons was founded, the Board of Regents of the College has authorized the organization of a clinical section in each of the states of the United States and in the provinces of Canada.

In establishing these sectional organizations the Regents do not desire to duplicate the medical societies that are now in existence, but to supplement them by state surgical sections which will be devoted almost exclusively to clinics at a get-together meeting each year of the Fellows of the American College of Surgeons in the various states and provinces. It is the hope of the Regents that these sections will tend to promote closer fellowship within the states, and to strengthen and elevate the standards of the College.

A clinical section has been effected and an Executive Committee elected to carry out the details of the project in practically every state of the United States and province of Canada.

OUTLINE OF ORGANIZATION

1. OBJECT: The organization of state and provincial clinical sections along the lines of the annual Clinical Congresses of the College, each section to hold an annual meeting within the state or province at some convenient time during the year.

2. FORM OF ORGANIZATION: One representative for each Congressional District within the state and two senatorial representatives at large, each to be elected by the Fellows of the state for a term of two years, one-half of the number to be elected each year by ballot from the central office two weeks in advance of the

annual Clinical Congress. This body shall correspond in the state to the Board of Governors of the College.

An Executive Committee for each state, composed of from three to five Fellows, to be elected annually by the representatives of each state. This Committee shall correspond to the Board of Regents of the College, and shall be the supreme executive body in the state in the conduct of clinical meetings. The officers of the Executive Committee shall be a chairman and a secretary. The Executive Committee shall make all arrangements for annual meetings, appoint all committees, select the meeting place, headquarters, speakers, etc.

Similar organizations have been effected in the provinces of Canada.

3. **MEMBERSHIP:** To comprise Fellows of the College and invited guests, the latter to include candidates approved ethically for Fellowship in the College by the respective State Credentials Committee, and to include also internists, pathologists, roentgenologists, sanitarians, editors of medical journals, and other medical men of influence.

4. **PROGRAM:** Clinics and clinical demonstrations to be conducted during the mornings by Fellows of the College, and invited associates, of the city in which the meeting is held; afternoon or evening meeting for the laity, to be addressed by invited laymen and surgeons. Invitations to this meeting shall be extended to the Chamber of Commerce, members of the Rotary Club and their wives, the Woman's Club, and to other prominent lay individuals and organizations as well as to the local profession of the city in which the meeting is held.

5. **EXPENSES:** The legitimate routine expenses of the state sections shall be cared for by the central body through an appropriation of a sum not to exceed three dollars for each Fellow of the College within the state.

In the conduct of the sectional clinical meetings, it is the purpose to adhere as closely as possible to the plans which have been universally approved by surgeons who have attended the national Clinical Congresses held in the large cities of the United States and Canada during the past ten years.

Close co-operation will be maintained between the state sections and the central executive office of the College, in order that the central organization, through its Board of Regents, may aid in developing the annual sectional clinical meetings.

STATES AND PROVINCES NOT YET ORGANIZED

Alabama, Delaware, the District of Columbia, Nevada, New Brunswick, New Mexico, Nova Scotia, Prince Edward Island, and Saskatchewan have not yet perfected sectional organizations. Because of the small number of Fellows resident within some of these states and provinces, it is presumed that they will later ally themselves with an adjoining state or province, as the individual case may warrant.

HOSPITAL STANDARDIZATION

The chief purpose of the American College of Surgeons, since its beginning in 1913, has been the betterment of the clinical practice of surgery. Surgery is a specialty of medicine; it is also an inseparable part of the science of medicine. Better practice of surgery, therefore, means the better practice of medicine, and it was with this fundamental idea that the College set about its work. Even matters of public health, the prevention of disease, the intelligent distribution of the benefits of medicine, medical education, and problems of hospital administration and equipment, are factors in any comprehensive plan of action with such an aim. The work of the College in these fields is called Hospital Standardization.

Details of the program of Hospital Standardization, what it is, how it developed, its meaning to the public, to the hospitals, and to the profession, and a bibliography of the subject, are given in the report of the College for 1919 (Bulletin Vol. IV., No. 4). The following pages are a report of progress for 1920.

Hospital standardization aims to safeguard the patient against error in diagnosis, against lax or lazy treatment, against unnecessary surgical operations or operations by unskilled surgeons; it aims to bring to every patient, however humble, the highest service known to the profession.

Backed by the common experience of practice, doctors today unanimously agree that if they are to create the highest service of which the profession is capable, they must at regular intervals review what they have done, what results they have accomplished, what mistakes, if any, they have made and why. No avoidable mistake should be repeated. In other words, it is the doctor's obligation to benefit constantly by his experience and to apply to his work the ever-increasing wisdom gained from that experience. Further, the doctor's duty to his profession, to himself, and to

society, requires that he benefit also by the clinical experience of his colleagues. The common experience of his colleagues is his, and his experience is theirs.

But how is the doctor to gain in a regular and orderly way the benefit of his own and his colleagues' clinical experience? To answer that question the Minimum Standard, given below, was designed.

The Minimum Standard grew gradually out of a thorough study of actual conditions in the practice of medicine. It grew out of the straight thinking of the clearest minds in medical and hospital work on this continent. It is practicable, workable, and constructive. It costs effort rather than money. It safeguards the care of every patient admitted to the hospital by insistence upon competence on the part of the doctor, on thorough study and diagnoses in writing for each case, and a checking up, at least once each month, of the clinical service of the hospital. It fixes responsibility throughout the hospital. It calls for the "production sheets" of the hospital, but does not cause in any way violation of the confidential relationship between the doctor and his patient. It encourages and even compels research. It defines the minimum service to the patient, which, beyond all debate, is considered essential.

Above all, the Minimum Standard is designed to bring a sense of responsibility to those who have to do with a hospital, that each patient admitted shall receive care scientifically sound. It is on this basis that the hospital may seek the confidence, good will, and support of its community.

The medical superintendent* of one of the leading hospitals of the continent recently said, after years of practical administration of the Standard:

"The Minimum Standard is not, perhaps, so simple as it looks. But certainly it does not impose too great a burden of effort upon the doctor or upon the hospital. It calls for no undue expenditure of money. It is not impertinent, for it is based upon the sound principles of practice which the profession long ago accepted. It forces a constructive and co-operative scrutiny over all medical

*Dr. M. T. McEachern, Vancouver General Hospital.

work in the hospital; unnecessary surgery, incompetent surgery, lax and lazy medical service, and all commercialism in medicine go down before it.

"The Minimum Standard is not a theory. Wherever it is tried with sincerity, it succeeds. One result of it, too, is that it swiftly submerges personal prejudices among doctors and unites them under those bonds which have always made the profession great."

Again, the *World's Work* last spring assigned to an investigator the task of making a report upon the effect of the Minimum Standard among hospitals. This report was published in the magazine for June, 1920. With regard to the Minimum Standard, the writer, Mr. Hawthorne Daniel, says in part:

"The statement is simplicity itself, and yet, with all of its simplicity it contains just the suggestions that go to make good hospitals of mediocre ones; just the suggestions that lead to the conservation of lives and the elimination of unnecessary operations; just the suggestions that bring about the conscientious care that every patient in every hospital has a right to expect.

"From coast to coast the idea is changing the conditions in hospitals. Everywhere there is the ferment of development, the activity of improvement. In great centers of medical affairs the changes have been startling. In Baltimore, the greatest center of medicine in America, there is not a hospital of 100 beds or more that has not put into effective operation the Minimum Standard.

"In New York and other cities the hospitals have made almost as great an advance. The world of the hospital is changing. An advance normally to be expected in twenty years has come in three. For this opinion I am indebted to President Henry S. Pritchett of the Carnegie Foundation.

"The medical profession generally is to be congratulated upon the progressive work being accomplished by its many prominent members who are Fellows of the American College of Surgeons. In its membership the College includes the best men in the field, and there are few prominent surgeons in the country who are not on its roll.

"The medical profession is largely made up of men who are practical idealists. Sometimes, under the forces of circumstances,

some of them may not have held entirely true to their own ideals, but it seems difficult to believe that many of them have ever allowed their ideals completely to lose control. And with the program of the College to supplement their own beliefs they are throwing aside those methods that are open in the least to criticism, and of their own volition have renewed and increased their efforts to bring about the reforms in which they always have believed.

"It is with this elusive force that the College has worked with such success. With the ideals of the profession visualized, and with practical plans made to insure their application, the country may confidently look forward to a new era that is already partly here; when the hospitals of America will be institutions for service, from which selfish interest and careless methods have been abolished, and to which the country may look for considerate and efficient treatment, confidently expecting and receiving the utmost that the medical profession is capable of giving."

THE MINIMUM STANDARD

The Standard provides:

1. That physicians and surgeons privileged to practice in the hospital be organized as a definite group or staff. Such organization has nothing to do with the question as to whether the hospital is "open" or "closed," nor need it affect the various existing types of staff organization. The word *staff* is here defined as the group of doctors who practice in the hospital inclusive of all groups such as the "regular staff," the "visiting staff," and the "associate staff."
2. That membership upon the staff be restricted to physicians and surgeons who are (a) competent in their respective fields and (b) worthy in character and in matters of professional ethics; that in this latter connection the practice of the division of fees, under any guise whatever, be prohibited.
3. That the staff initiate and, with the approval of the governing board of the hospital, adopt rules, regulations, and policies governing the professional work of the hospital; that these rules, regulations, and policies specifically provide:

(a) That staff meetings be held at least once each month. (In large hospitals the departments may choose to meet separately.)

(b) That the staff review and analyze at regular intervals the clinical experience of the staff in the various departments of the hospital, such as medicine, surgery, and obstetrics; the clinical records of patients, free and pay, to be the basis for such review and analyses.

4. That accurate and complete case records be written for all patients and filed in the hospital, a complete case record being one, except in an emergency, which includes the personal history; the physical examination, with clinical, pathological, and X-Ray findings when indicated; the working diagnosis; the treatment, medical and surgical; the medical progress; the condition on discharge with final diagnosis; and, in case of death, the autopsy findings when available.

5. That clinical laboratory facilities be available for the study, diagnoses, and treatment of patients, these facilities to include at least chemical, bacteriological, serological, histological, radiographic, and fluoroscopic service in charge of trained technicians.

THE "APPROVED" LIST

Following herewith is a list of the general hospitals of one hundred or more beds in the United States and Canada which on inspection either met the Minimum Standard or later during the current year reported that they meet that Standard.

In presenting this list the Regents of the College are quite aware that artificial standardization is indefensible. After five years of work, however, upon the problem of better service in hospitals, the Regents believe that the standard upon which this list is based is fundamental. They are borne out in this view by the hospital administrators and hospital trustees. The list, therefore, marks in an accurate fashion the progress of the medical profession in making its own ideals come true in practice.

The hospitals named in the list are taken from a group of 671 hospitals. Two years ago 89 out of these 671 hospitals fulfilled

the Minimum Standard; one year ago 198 out of the 671 met the Standard; at the present time 396 of the group meet the standard.

These figures are the findings of personal visits to the hospitals by staff members of the College. These men, all graduates in medicine, visited the hospitals not as spies nor as meddlers. They went rather as engineers, discovering first what the shortcomings of the institutions were and then indicating how those shortcomings might best be overcome. The council meetings held at the various hospitals by these visitors are a most important factor in the success of the entire work.

In addition to the 695 general hospitals of 100 or more beds in the United States and Canada, there are in these two countries 979 general hospitals of from 50 to 100 beds.

On every hand evidence exists today of a new and powerful interest on the part of the public in hospitals. The time is not far distant when a hospital, in co-operation with the doctors who practice in it, must either soundly protect the patients' right to be well or forfeit all claim to the confidence and good will of the community.

HOSPITALS WITH A CAPACITY OF 100 OR MORE BEDS IN WHICH THE MINIMUM STANDARD IS IN EFFECTIVE OPERATION

Those marked (*) were deficient in one or more details at the time of inspection but later reported complete fulfilment of Standard.

THE BY-LAWS

I. NAME. The name of the corporation shall be the American College of Surgeons.

II. OBJECT. The object of the College shall be to elevate the standard of surgery, to establish a standard of competency and of character for practitioners of surgery, to provide a method of granting Fellowships in the organization, and to educate the public and the profession to understand that the practice of surgery calls for special training and that the surgeon elected to Fellowship in this College has had such training and is properly qualified to practice surgery.

III. THE COLLEGE. 1. The College shall consist of all members of the corporation. Such members are to be designated as Fellows. The College shall vest the general management of the corporation in a Board of Governors. The Board of Governors shall, in turn, vest the details of the management in a board of trustees to be known as the Board of Regents.

2. The College shall hold an annual meeting on the day and at the place selected for the annual meeting of the Board of Governors.

IV. BOARD OF GOVERNORS. 1. The original Board of Governors shall consist of the surgeons invited by the Organization Committee to serve as Founders of the College, who have qualified as Fellows. The members of this first Board of Governors shall also be known as the Founders of the American College of Surgeons.

2. The original Board of Governors shall be divided by lot into three classes to serve one, two, and three years, respectively. At the annual meeting in 1914, and at the annual meeting in each year thereafter, the Fellows of the College shall elect (in a manner to be determined by the Board of Regents) fifty surgeons from among the Fellows of the College to membership on the Board of Governors, each to serve for a term of three years; thirty of these members are to be elected from a list of nominations, consisting of three members, each nominated by the following sixteen surgical associa-

tions and societies of North America, including one each from the United States Army and from the United States Navy:

1. American Surgical Association.
2. Surgical Section of the American Medical Association.
3. Section on Obstetrics, Gynecology, and Abdominal Surgery of the American Medical Association.
4. General Surgical Division of the Clinical Congress of the American College of Surgeons.
5. Division of Surgical Specialties of the Clinical Congress of the American College of Surgeons.
6. American Gynecological Society.
7. Southern Surgical Association.
8. Western Surgical Association.
9. Section on Surgery of the Canadian Medical Association.
10. American Association of Obstetricians and Gynecologists.
11. American Orthopedic Association.
12. American Association of Genito-Urinary Surgeons.
13. American Laryngological Association.
14. American Ophthalmological Society.
15. American Otological Society.
16. American Institute of Homeopathy.

Twenty members shall be elected at large to represent surgeons of North America not affiliated with the above societies or associations. In case of failure of any of the above-named organizations to make its quota of nominations, or in case of duplication of nominees, the Board of Regents shall nominate members from among the Fellows at large for the vacancies so caused in the list of nominees. The Board of Regents shall in the same manner fill all vacancies in the current membership of the Board of Governors due to death, resignation, or other causes.

3. The Board of Governors shall at its first meeting elect from among its own membership fifteen who shall be members of the Board of Regents; this group shall be divided into three classes of five members each, whose terms of office shall expire in one, two, and three years, respectively. As the term of service in each class expires, their successors shall be elected, each for a term of three years, by the Board of Governors in a manner to be determined

by the Board of Regents. Not more than four of each class shall be selected from one country. In event of death or resignation of any member of the Board of Regents, his successor shall be elected at the next regular or special meeting of the Board of Governors, but the Board of Regents may appoint a member of the Board of Governors to serve as Regent until this election takes place.

4. The Board of Governors shall meet in executive session annually for the transaction of business, which business shall include the election of members of the Board of Regents and other routine business which may be brought before it by the corporation or the Board of Regents. Such meetings shall be called by the Secretary General, at the direction of the Board of Regents. Special meetings of the Board of Governors may be called by the Secretary General at any other time at the request of the Board of Regents. Members of the Board of Governors shall be expected to attend other formal meetings and convocations called by the Board of Regents for the purpose of conferring Fellowships and for the transaction of other business.

5. Fifty members of the Board of Governors shall constitute a quorum for the transaction of business.

V. OFFICERS. 1. The officers of the College shall be a President of the College, a First Vice-President, a Second Vice-President, a Secretary General, a Director, and a Treasurer.

2. The President, the First Vice-President, and the Second Vice-President shall be elected each for a term of one year or until his successor is elected by the Fellows of the College at their annual meeting. The Secretary General, the Director, and the Treasurer shall be appointed by the Board of Regents. The Treasurer shall be appointed for a term of one year or until his successor is elected; the Secretary General and the Director shall hold office during the pleasure of the Board.

3. The President of the College shall preside at all regular and special meetings of the College and of the Board of Governors, and at all Convocations for the conferring of Fellowships.

4. The First Vice-President shall preside at all meetings of the College in the absence of the President, and in the event of the

death or resignation of the President shall assume the duties of that officer.

5. The Second Vice-President shall preside at all meetings of the College in the absence of the President and of the First Vice-President, and in the event of the death or resignation of these two officers shall assume the duties of the President.

6. The Secretary General shall be the chief executive officer of the College. Under the direction of the Board of Regents he shall have supervision of all activities and business affairs of the College, including the direction of the general executive office; he shall audit all expenditure and disbursement of funds of the College; he shall have charge of the Convocations and of the Clinical Congress of the College; he shall mail to the proper addresses all notices of all regular and special meetings of the College; he shall issue at stated intervals the Year Book of the College; he shall attend all meetings of the Board of Regents.

7. The Director shall be the chief executive officer of the educational activities of the College and under the direction of the Board of Regents shall have charge of admissions to Fellowship, of Hospital Standardization, and of other matters concerned with the educational work of the College; he shall have power to appoint and to remove subordinate employes engaged in the work of the College for which he is responsible. He shall attend all meetings of the Executive Committee and of the Board of Regents.

8. The Treasurer shall receive all funds of the College and disburse the same on checks, signed by him and countersigned by the Director or by the Secretary General. He shall make a report in writing to the Board of Regents at each meeting of that Board of the moneys received and expended, and shall furnish a detailed statement of the financial condition of the College at each annual meeting of the Board of Regents. The Treasurer shall furnish a bond to the Board of Regents for the faithful performance of his trust.

VI. BOARD OF REGENTS. I. The Board of Regents shall consist of sixteen members, fifteen of whom shall be elected from among the Fellows by the Board of Governors in a manner to be determined by the Board of Regents. One member shall be

elected by the Fellows of the College at their annual meeting as hereinafter provided, the Fellow thus elected to membership in the Board of Regents to be President of the College.

2. The Chairman of the Board of Regents shall be elected from among the members of the Board of Regents for a term of one year and shall preside at all meetings of the Board. In the event of his death or resignation, the office shall be filled by election at the next meeting of the Board.

3. The Secretary General of the corporation shall be the Secretary of the Board of Regents.

4. The duties of the Board of Regents shall be those ordinarily performed by a governing board, namely: To transact all detail business devolving upon the Board of Governors in carrying out the object of the organization; to regulate and to conserve the property interests of the College; to adopt rules and regulations for the admission of Fellows; to fix initial fees and annual dues of Fellowship; to create, appoint, and direct all standing committees; to elect Fellows to the College; to call all meetings of the corporation not already provided for; to arrange Convocations or other meetings for the conferring of Fellowships; to transact all business not otherwise provided for that may pertain to the organization.

5. Nine members of the Board of Regents shall constitute a quorum for the transaction of business.

6. Regular meetings of the Board of Regents shall occur once in twelve months at the call of the Secretary General. Special meetings may be convened at any time by the Secretary General, or on a request to him made in writing and signed by thirty members of the Board of Governors, or by nine members of the Board of Regents.

VII. EXECUTIVE COMMITTEE. 1. There shall be an Executive Committee, consisting, first, of the President of the College, of the Secretary General, and of the Treasurer; and second, of five other Regents elected by the Board of Regents by ballot for a term of three years, who shall be eligible for reelection, provided, however, that, of the members of the Committee first elected by the Board of Regents after the adoption of these by-laws, two shall serve for one year, two for two years, and one for three years,

and such members of the Committee shall determine their respective term by lot. Should the term of service, however, of any member of the Executive Committee terminate as a member of the Board of Regents, his term of service upon the Executive Committee also thereby terminates.

2. At least thirty days prior to the annual meeting of the Board of Regents, a Nominating Committee, consisting of the Chairman of the Board and of two Regents appointed by him, shall send notices by mail to all members of the Board of the vacancies in the Executive Committee to be filled at the ensuing annual meeting, and shall invite suggestions of names of Regents to be nominated as members of the Executive Committee. The nomination of this Committee shall be voted upon by the Board of Regents.

3. During the intervals between the meetings of the Board, the Executive Committee shall exercise all the powers of the Board of Regents in the management and direction of the business and the conduct of the affairs of the corporation, except that it shall not have power to elect Fellows, or to regulate initial fees or annual dues of Fellowship. It shall have supervision of the property of the corporation, and shall determine the investment of its funds. It shall direct the manner in which the books and accounts of the corporation shall be kept, and shall cause to be examined from time to time the accounts and vouchers of the Treasurer for moneys received and paid out by him. It shall keep a record of its proceedings and report the same to the Board of Regents at the next succeeding meeting for its approval. It may, in its discretion, appoint such sub-committees as it may deem necessary or desirable for the proper transaction of the business of the corporation. Whenever any vacancy shall occur in the Executive Committee, or in any office of the corporation, by death, resignation, or otherwise, it shall be filled by appointment by the Executive Committee for the remainder of the current corporate year. It may adopt rules and regulations for the conduct of its meetings and the management of the affairs of the corporation, not inconsistent with the laws of the state of the incorporation of the College, and with the by-laws of the College. It may hold its meetings at such

place or places as it may from time to time determine. A majority of the Executive Committee shall constitute a quorum for the transaction of business.

VIII. FELLOWS. 1. The Fellows of the College shall be graduates in medicine who are licensed to practice medicine in their respective states and provinces, or medical officers of the federal services who have made an application for Fellowship (such application being endorsed by three Fellows of the College, one of whom shall be a member of the Board of Governors), who meet the qualification requirements that shall from time to time be established by the Board of Regents, and who shall be elected to Fellowship by the Board of Regents on recommendation of the Committee on Credentials, and who shall have signed the roll.

2. Each individual elected to Fellowship in the College shall be designated as a Fellow of the American College of Surgeons and shall be authorized and encouraged to use the letters F.A.C.S. after his name on professional cards, in professional directories, and in articles published in surgical literature.

IX. PUBLICATIONS. The Board of Regents shall issue each year a directory containing the names and addresses of the Fellows of the American College of Surgeons arranged by states, provinces, and colonies.

X. Any Fellow of the College may be expelled for conduct which, in the opinion of the Board of Regents, is derogatory to the dignity of the College or inconsistent with its purposes. Such expulsion must be voted by a majority vote of the whole Board of Regents at any meeting, at which meeting the Fellow against whom charges are made shall be invited to be present, and may appear or may be represented, in a manner to be determined by the Board of Regents.

XI. These by-laws may be amended by a majority vote of those present at any regular or special meeting of the Board of Governors, or at a meeting called for the purpose on request made in writing by a hundred members of the Corporation, provided that such proposed amendments are included in the call of the meeting at which such action is contemplated.

XII. The College shall hold an annual session of about one

week in length at such place and time as may be determined by the Board of Regents which may include:

1. The Clinical Congress of the American College of Surgeons consisting of (a) scientific and literary papers concerning or relating to the art and science of surgery; (b) surgical and diagnostic clinics.

2. Annual meeting of the Fellows of the College, as provided by Article III, Section 2.

3. Annual meeting of the Board of Governors of the College, as provided in Article IV, Section 4.

4. Convocation of the College at which occasion candidates for Fellowship may be admitted to Fellowship in the College.

INCORPORATION

STATE OF ILLINOIS

Department of State

CORNELIUS J. DOYLE, Secretary of State

To All to Whom these Presents Shall Come, Greeting:

WHEREAS, a CERTIFICATE, duly signed and acknowledged, has been filed in the office of the Secretary of State, on the 25th day of November, A. D. 1912, for the organization of the

AMERICAN COLLEGE OF SURGEONS

under and in accordance with the provisions of "AN ACT CONCERNING CORPORATIONS" approved April 18, 1872, and in force July 1, 1872, and all acts amendatory thereof, a copy of which certificate is hereto attached; Now Therefore, I, CORNELIUS J. DOYLE, Secretary of State, of the State of Illinois, by virtue of the powers and duties vested in me by law, do hereby certify that the said

AMERICAN COLLEGE OF SURGEONS

is a legally organized Corporation under the laws of this State.

IN TESTIMONY WHEREOF, I hereto set my hand and cause to be affixed the great Seal of State. Done at the City of Springfield this 25th day of November, A. D. 1912, and of the Independence of the United States the one hundred and thirty-seventh.

[SEAL]

(Signed) C. J. DOYLE, Secretary of State.
